

Tulips

Tatiana Dallest-Agoritsas

Stick decal TL136 Tulips (or draw them by hand in the center of the plate) as well as TL106 Ferns on the border of the plate. Firing 018 Paint the tulips with the following colors: Wooden Rose, Burgundy and Intensive Purple. These colors are very dark and intensive (as well named); therefore, it will give you the opportunity to create beautiful lights with the help of a brush well cleaned in lavender.

Stick blue tape (or red varnish) and sponge the purple circle with a mixture of Burgundy and Intensive Purple. In order to obtain a very neat border, allow the color to dry and use the scrapper Exacto. With a long brush, paint the grass and the foliage with the following colors: Tender green, Linden green, Foliage

green and also the colors you used for the tulips. Paint the ferns very lightly, rather with the warm colors. Firing 015

If it is more convenient for you, this work can be done in several steps and several firings if necessary. Finish with matt gold: don't forget to apply red varnish on all the parts to be spared, as the tulips stems and/or the ferns. Firing 018 Polish the gold.
